

PHOTO RESOLUTION / SIZE GUIDELINES

Note: Resolution is measured in pixels across the longest dimension of the photo. Resolution minimums are for original photo images that have not been enlarged or resized (interpolated).

Large Scale Photo Murals with longest dimension exceeding 15' typically require specialty panoramic photo images to achieve a clean look. We are proud to offer Panoramic Images line of ultra-high resolution photos that are suitable for murals ranging from 15' up to 50' wide.
